

**Striving to be the Worlds Leading Provider in Air & Airless Shotblast Equipment & Service!**

# FOXTECH

The Flextech Hanger Bearing® is a patented product designed by Fox-Tech Inc. to be used in Screw Conveyors. Flextech is made of steel cast hubs and machined steel cast inner fins that are filled with urethane allowing the Hanger Bearing flexibility to move and thus helping in the alignment of the screws when in operation. The Hanger plate itself can be customized to fit your needs. For more information or to order the Flextech Hanger Bearing please contact Always Dependable Service Inc.
