Flex-Tech Hanger Bearing

Official Supplier

The FLEX·TECH Hanger Bearing® is a patented product to be used in Screw Conveyors. FLEX TECH is made of steel cast hubs and machined steel cast inner fins that are filled with urethane allowing the Hanger Bearing flexibility to move and thus helping in the alignment of the screws when in operation. The hanger plate itself can be customized to fit your needs. For more information or to order the FLEX·TECH Hanger Bearing please contact Always Dependable Service Inc.® FLEX TECH® Official Distributor 905-560-2010.
